RENTAL ASSET MANAGEMENT

Increase profitability and lower operating costs of your company's rental business with our integrated rental asset management software, integraRental. Feature rich, flexible and easy to use, integraRental puts the necessary information at your fingertips to conveniently reserve, track, schedule, and maintain assets across multiple locations! The 28 day view gives you a snapshot of what's rented, when it's returning and its profitability, giving you the tools to manage assets in real-time. Integration with our ERP suite of software solutions ensures accurate billing, financials and utilizes a single customer data base.

GROW REVENUE WITH RENTAL AVAILABILITY MANAGEMENT

- 28 day availability and hourly view allows for quick assessment of every item in the rental inventory.
- Maximize the rental longevity of each asset by using up to date rental and maintenance information.
- System generated overages are correctly charged to the customer at check in.

The screenshot shows the 'New Reservation' page in the integraRental system. It includes a search bar with 'power' entered and a search button. Below the search bar is a table of reservation items with columns for Description, Category, Loc Qty, Comp Qty, and various rate options (HalfDay, FullDay, Weekly, Monthly). A 'More Rates' link is present for each row.
