

# Office 365 Productivity Services

Simplify your life, and get data on the devices you use, when you need it. Increase your organizations productivity by leveraging Microsoft Office 365.

integraSoft Consulting Services easily migrate organizations from existing email solutions and helps them get up and running on Office 365. Once migrated, we are available to act as your IT resource as needed to administer and support your Office 365 deployment on your behalf or help enable your organization to feel comfortable owning support & administration. We offer packaged and customized support plans that enable you to utilize us as needed.

The Microsoft Office 365 service offering combines the familiar Office desktop suite with the latest, cloud-based versions of Microsoft's next-generation communications and collaboration services: Microsoft Exchange Online, Microsoft SharePoint Online,

and Microsoft Lync Online. These services work together seamlessly to provide the best productivity experience on PCs, phones, tablets, and browsers\*. Office 365 is powered by the same dependable Microsoft email and collaboration products that businesses have been using for decades.
