SCHEDULED INTERNAL SERVICE ON EQUIPMENT

The ability to place returning assets into maintenance mode directly from check-in screen. Use service tracking and schedule preventative maintenance based on your timing needs.

SERVICE

- Schedule preventative maintenance based on calendar days, rented days or metered hours
- Predefine suggested parts and labor along with instructions
- Create service tickets for unintended service operations
- Capture labor and parts consumption to provide a more accurate understanding of the profitability of your rental assets
- New items added will automatically inherit preventative maintenance programs set up for the master asset
