

Payment Solutions from CenPOS

integraSoft understands the challenges facing merchants today and we have worked to find the best option to optimize your payments and streamline your overall sales cycle. We've partnered with CenPOS to integrate CenPOS electronic payment solutions across our entire integraSuite product line. Through our integraSoft & CenPOS solution we provide the tools to get you paid faster, centralize your payment solutions, reduce collection activities, and lower your payment processing costs to give your business the freedom to succeed and grow.

- Sell More
- Lower Costs
- Improve Customer Satisfaction
- Reduce Errors
- Get Paid Faster

ELIMINATE RISK OF DIGITALLY STORING CREDIT CARDS

Are your customer credit card numbers safe? You've noticed many high-profile credit card-related data security issues in the headlines, it's time to ensure your information is more secure. integraRental with payment solutions from CenPOS provides you with a PCI compliant level 1-certified provider payment gateway provider. Customer credit card numbers are

stored securely at CenPOS data centers and never on your integraSoft servers deployed at your location or in the cloud. CenPOS relieves you of the liability associated with digitally storing credit card numbers.

SAVE MONEY

CenPOS can help you save money in several ways:

- ✓ On average, our customers are saving over their current credit card gateway provider, .5% to 1.5% points off their processing fees with CenPOS. Why? Because CenPOS intelligently manages transactions on your behalf to ensure you are getting the best rate for every single transaction you process. Being PCI compliant also contributes to lower interchange fees.
- ✓ Through reduced risk of not digitally storing credit cards you might be able to lower your business liability insurance premiums.
- ✓ Easy to use CenPOS Merchant Administration portal to help you efficiently manage, report and audit your credit card transactions.

ABOUT CENPOS

CenPOS is a merchant-centric, end-to-end payments engine that drives enterprise-class solutions for businesses, saving them time and money, while improving their customer engagement. CenPOS's secure, cloud-based solution optimizes acceptance for all payment types across multiple channels without disrupting the merchant's banking relationships.

CHOOSE YOUR PROCESSOR

With CenPOS, you can keep your current processor or easily move to one of their preferred providers and potentially achieve additional savings. The choice is yours!

MODERNIZE YOUR PAYMENT SOLUTIONS

Are you Chip and Pin enabled? In October 2015, the liability for Swipe and Sign shifted to the merchant (that's you!). Whenever card fraud happens, it will be determined who is liable for the costs. What has changed is that if there is an incidence of card,

whichever party has the lesser technology will bear the liability. Are your credit card readers ready? integraSoft with Payment Solutions from CenPOS is Chip and Pin enabled.

IntegraSoft is also working with CenPOS to enable future versions of integraSoft to integrate CenPOS ACH (Automated Clearing House) payments. This will allow our customers to electronically collect from their customers for either recurring or one-time payments by directly debiting customer's checking or saving accounts. ACH payments can serve as an efficient and cost-reducing alternative to personal or company paper checks and credit cards for vendor payments or employee direct deposit.

OUR CURRENT CUSTOMERS

The reduced risk and savings above can typically pay for the upgrade of your legacy integraSoft products. CenPOS is integrated directly into integraSoft and our current integraSuite of features including ERP, Ecommerce, Sales Mobility and Warehouse RF. There is no separate need for a standalone Credit Card PC. Credit Card transactions happen quickly and in real-time within integraSoft. Reduce potential problems and the need for support associated with using an older credit card technology. With the CenPOS

solution, you can forget those issues and focus on your business.

WHY CHOOSE INTEGRASUITE WITH CENPOS?

In today's dynamic business environment, payment processing solutions and requirements for merchants are constantly changing. You need a technology partner who help you controls expenses and mitigate risks. integraSoft helps you navigate the complexities of billing and receivables, making it easy for you to do what you do best; grow your business. We work to keep you informed and educated on industry updates and are working to provide solutions that integrate the latest in payment solutions for retail, online and mobile.
