Put your sales tax on autopilot, so you can spend time on the things that make your business more profitable. Spend time on your business. Not sales tax.

-  Sell More
-  Lower Costs
-  Improve Customer Satisfaction
-  Reduce Errors
-  Get Paid Faster

NEW TAX CHALLENGES FACING COMPANIES TODAY

- ✓ In the 2018 South Dakota v. Wayfair ruling, the Supreme Court ruled that states can apply their sales tax laws to out-of-state retailers even if the retailer has no physical presence in the state.
- ✓ Now, economic nexus can be established based on number of transactions or revenue on products sold into that state - requiring businesses to collect and remit sales tax to those states.
- ✓ Each state is also creating their own sales tax laws, creating different nexus thresholds, marketplace facilitator rules, and rates based on the location and product category.

ELIMINATE THE RISK OF PAYING THE WRONG SALES TAX

- ✓ No more manually entering data or uploading rate tables and tax information.
- ✓ Remove the worry about the correct tax percentages or keeping track of changing rates.
- ✓ Report and file the accurate sales tax to every state in which you have nexus.

SAVE TIME AND MONEY

- ✓ Accurate, return-ready reports.
- ✓ Quick and easy setup.
- ✓ Prepare and file sales tax in minutes, not hours.
- ✓ The ability to access your sales tax history in seconds.
