Packing with integraWMS

OPTIMIZE THE PACKING PROCESS

No more unwanted customer returns or giving away products. Get it right the first time with integraWMS product to container verification including versatile solutions such as pick direct to container, bulk packing, inner packs, pack to pallet, and more.

ACCURACY

Achieve unprecedented accuracy and savings with integraWMS packing solutions. Consolidate orders and picking assignments, validate pick operations and ensure order completeness prior to shipping. Includes:

• Product Barcode Scanning
• Viewable Product Images
• Pick Validation
• Product to Container Tracking
• Order Consolidation

EFFICIENCY

Grow your bottom line! Move more product faster with less resources and energy. When combined with picking, integraWMS reduces steps to pack and move product out the door. Includes:

• Pick Direct to Container
• Merge Picking Assignments
• Consolidate Orders
• Pack Direct to Pallets
• Bulk Packing

CUSTOMER CARE

Intuitive tools from integraWMS help keep customers happy and attract new business. Use integraWMS to record product details by container, print GS1 labels and other necessary shipping documents based on unique customer needs and reporting requirements. Includes:

• Multiple Packing Slip Templates
• Configurable Views and Packing Experiences
• Container Contents Review and Reporting
• Create GS1 Labels
• Generate Advanced Ship Notifications
