Cloud Hosting

A comprehensive Cloud solution. Move data completely to our integraSoft-managed Cloud service.

- Avoid server downtime with cloud hosting. With cloud-hosted servers, your locations will always have access to your main server database.
- Replaces need for an on-site server. Focus more on your business and let our experts manage your server.
- Eliminates additional server contract and maintenance fees.
- Rapid restoration of data when necessary. On-site servers can take days to troubleshoot and restore.
- Optimize work access for remote employees with included VPN connections for multi-location operations.
- Includes Cloud Backup.

Cloud Backup

On-Site Server-to-Cloud nightly backup of your integraSoft data.

- Protect your data against disaster with backups of your month's end and, if requested, year end.
- Automatic nightly backups save time - reduce time spent swapping tapes!
- Your data remains encrypted and password protected during transition and storage.
- Geo-redundant data centers ensure your data is safeguarded at two separate data center locations.
- Compatible with most current on-site servers, ensuring ease-of-transition for your establishment.
